DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Tuesday, 05 September 2023 at 05:45 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Areas of Moderate air pollution become widespread on Tuesday for much of England and Wales as the dry, settled weather remains established and south-easterly winds bringing a continental feed of air.

Tomorrow: Widespread Moderate air pollution persists across the UK on Wednesday as the hot, settled conditions continue. Some patches of High air pollution possible in the south of England.

Outlook: Continued light winds and very warm conditions will most likely lead to a continued widespread Moderate air pollution in England and Wales, potentially reaching High levels locally in the south at times. Air pollution levels remaining mostly Low in northern England, but some Moderate patches are possible.
